How to make an icon with the AI icon generator

Three steps to a custom icon with the AI icon generator, from a blank prompt to a set for your project.

1

Describe your icon

Write the app or symbol, the style, and the colors — for example, a glossy 3D weather icon, or a flat minimal fox mascot. The more specific the prompt, the closer the icon comes to what you pictured.

2

Pick a model and generate

Choose GPT Image 2 or Nano Banana 2 in the AI icon generator, then generate. Each generation spends credits, so you sign in first and every run stays intentional.

3

Refine into a set

Adjust the symbol or palette in your prompt and generate again, keeping one style across the set until every icon fits your project.
